Görkem Karyol

Software Engineer | Full-Stack Developer

Address: Istanbul, Türkiye
Phone: +90 530 910 38 48
Email: me@gorkemkaryol.dev
GitHub: github.com/Glory42
Web: gorkemkaryol.dev
LinkedIn: linkedin.com/in/glory42

PROFESSIONAL SUMMARY

Full-stack software engineer building web applications and AI-powered products with TypeScript, JavaScript, Node.js, Bun, and React. Works across frontend and backend, from Next.js interfaces to REST APIs, PostgreSQL and MongoDB databases, and Docker and Cloudflare infrastructure. Recently cut AI payload sizes by 90% on an AI SaaS for e-commerce photography.

TECHNICAL SKILLS

Programming Languages: TypeScript, JavaScript, Go, Python, SQL
Backend: Node.js, Bun, Express.js, NestJS, Hono, REST APIs
Frontend: React, Next.js, Astro, Tailwind CSS
Databases & Data: PostgreSQL, MongoDB, Redis, Supabase, Drizzle ORM
Infrastructure & Tools: Linux, Docker, Cloudflare, Git

PROFESSIONAL EXPERIENCE

Software Engineering Intern | **Lodos** April 2026 – Present

- Contribute to social and community platforms that grew to 5,000+ active users within 8 months.
- Develop web application features in React, Next.js, and TypeScript within a collaborative engineering team.
- Help design and implement scalable platform features, real-time systems, and user experience improvements.

Full-Stack Engineer | **Holala** February 2026 – March 2026

- Engineered a high-performance AI SaaS for e-commerce photography in a strict, type-safe Turborepo monorepo using Bun, React, TypeScript, and Drizzle ORM.
- Optimized frontend data handling with TanStack Query, eliminating race conditions in the image-generation flow.
- Reduced AI payload sizes by 90% through image compression with Cloudflare Images and R2 storage.

Cybersecurity Intern | **Opet** July 2025 – August 2025

- Conducted vulnerability assessments using Kali Linux and categorized findings by severity.
- Developed custom security tools in Go, including a port scanner and a hash-cracking utility.
- Analyzed vulnerability reports from multiple external vendors to identify overlapping findings and coverage gaps.

SELECTED PROJECTS

AI SaaS Generator | Bun, Express.js, React, TypeScript, Supabase, Cloudinary, Google Gemini API **GitHub**
Production-ready AI image platform that dynamically routes requests between Gemini models to optimize API costs.

F1 Prediction | Astro, TypeScript, Hono, Python, Drizzle ORM, PostgreSQL, Cloudflare Workers **Live Site**
Predicts Formula 1 race winners from live session data using a 12-feature weighted model and softmax probabilities.

Interis | Bun, Express.js, TypeScript, React, TanStack Router, PostgreSQL, Drizzle ORM, TMDB API **Live Site**
Full-stack, Letterboxd-style platform for tracking, discovering, and reviewing films and TV shows.

Waste-Wise | NestJS, React, FastAPI, Python, PostgreSQL, Google OR-Tools **GitHub**
Optimizes municipal waste collection routes using time-series machine learning forecasts of bin fill levels.

EDUCATION

B.Sc. in Computer Engineering (English) | **Haliç University, Istanbul, Türkiye** September 2021 – 2026

CERTIFICATIONS

Learn React (October 2025) · Learn Go Course (August 2025) · Learn Node.js Course (February 2025)
Design Databases with PostgreSQL Skill Path (January 2025) · Building Interactive JavaScript Websites (December 2024)

LEADERSHIP & COMMUNITY

Core Member, Project Team Member | **Google Developer Groups on Campus Haliç** September 2024 – Present

LANGUAGES

Turkish: Native · **English:** Full Working Proficiency · **German:** Elementary · **French:** Elementary
